

CRUISERLIFT

The Cruiserlift motorcycle transport system may not be the “original” motorcycle lifting system on the market, but we did our homework. Just looking at the Cruiserlift system will convince you that the system is the most aesthetic, most reliable, best engineered, and safest motorcycle lifting system for your motor coach. The Cruiserlift motorcycle transport system has a motorcycle weight capacity of 1000 pounds. You may also flat tow up to a 6000 pound vehicle.

See reverse side for additional information and standard features.
